ILLEGAL DUMPING OR LITTERING ISSUES

Dumping trash and/or scattering litter are unlawful activities under the following Commonwealth statutes:

PA Crimes Code, Title 65
PA Vehicle Code, Title 75
Fish & Boat Code
Game & Wildlife Code
PA Code, Title 25

REPORT LITTERING INCIDENTS TO:

Your Municipal Office, or
PA Dept of Environmental Protection, 717-705-4700

2515 York Road, Gettysburg, PA 17325
(717) 334-7502

Dear Patron:

*I know you're busy, so we won't give you a long discussion on why you should recycle; chances are, you already know. So we'll just take a moment to tell you about our recycling program. These items directly support the Homeless Shelter on York Road and our Family Shelter in Gettysburg. Your involvement in our recycling program helps us to provide shelter for the homeless, meals, job training and counseling. All we ask is that you donate recyclable items that you may now be putting in the trash. On behalf of the homeless we "thank you" for your clean recyclable items. **WE ARE GRATEFUL FOR YOUR SUPPORT!***

Adams Rescue Mission Director

Electronics *(Computers, TV’s and their peripherals; not toasters, radios, etc.)*

In November 2010, the Covered Device Recycling Act (CDRA) was passed, which established requirements for individuals and entities with the handling of covered devices (i.e., computers, monitors, peripherals and televisions.) As a result, these items from Adams County must be taken to an R2/e-Stewards certified recycler or an approved drop-off point for these recyclers.

If you reside in one of Adams County municipalities that is a participant in one of the Collective Groups Waste Contracts, check with your municipal office or waste hauler to inquire about Covered Device Recycling Events.

Paint (Old) - Handling & Disposal

Oil based paint has a shelf life of 15 years; water based paint has a shelf life of 10 years if it has not been repeatedly frozen and thawed. Old paint is usable if it mixes when you stir it & no lumps appear when you brush it on a surface.

To safely dispose of non-aerosol, unusable paint/stain (oil or water-based) - mix kitty litter, commercial hardener (available at hardware stores), shredded newspaper, sand or other absorbent material with the old paint until it solidifies.

Seal the can tightly and place in your regular trash.

So why can't all plastics be recycled together?

There are many types of plastics, like the many types of metals and papers. And, like metals and papers, the different types of plastics need to be kept separated in order to be recycled properly.

Different types of plastics serve different purposes, such as...

PET (#1) – used for soda bottles because it keeps the “fizz” in your carbonated drink.

HDPE (#2) – used for milk and detergent bottles because it can be molded into a shape with a handle, making it easier for dispensing.

The code number on plastic items refers to the general type of resin contained in that item and differences can be found within some items using the same general resin. For the various plastics to retain their special properties when being recycled into new products, they must be kept separate from each other. Caps and lids should be removed from all bottles as they are made from another type of resin and need to be processed separate from the bottles.

Example: Two different items are labeled #2 HDPE; however, their properties may not be the same and require different handling. Bottles that are “blow-molded” containers are different from margarine tubs that are “injection-molded” containers. One melts at a very high temp, the other melts at a very low temp. If they are mixed in the recycling process, the resulting container would be contaminated and not usable in the packaging industry.

In Adams County, only #1 and #2 bottles (a container with a neck that is smaller than the bottom) are recyclable through most programs. Check with your recycling hauler to determine if additional plastics are accepted. You can also check the listings in this brochure under Plastic for additional options.

Why are there articles in the news about recycling issues?

Contamination is one of the biggest problems facing recycling facilities, limiting the markets for their materials. However, you can help! Find out what materials your hauler/recycler accepts and only place those materials in your recycling bin.

This brochure is also available on the Adams County website at: www.adamscountypa.gov
